The above computer is suitable only for an 'upgrade'. It is designed to utilize your current monitor, mouse, keyboard, scanner / printer and operating system. If you require replacements or upgrades for these items, check the following optional extras listed below.

Windows 95, 98 and Windows ME operating systems are no longer supported by my business for installations or servicing. If you are currently using any of these outdated operating systems you will also have to purchase or provide a Genuine Licensed Windows 2000 or Windows XP product to be installed onto this computer.

The D-530 SFF Computer is well engineered from high quality components.

It uses an Intel chipset based main board,

4 DDR RAM slots allowing a total of 4GB RAM operating in Dual Channel mode,

6 high speed USB 2.0 Ports,
Front & rear access
Sound & microphone ports
