

# Registering the **AVAST** Security system

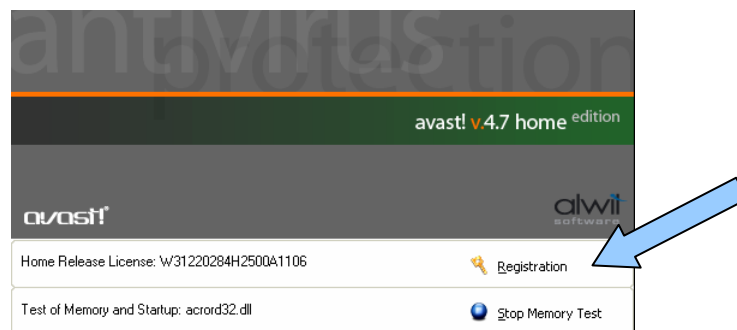

By Jon Benjamin 'EXENVOID'

These instructions are suitable for new installations,  
or for when your current registration has expired.

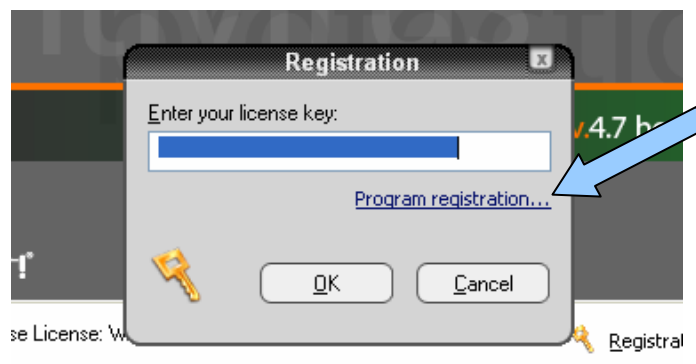

1. Ensure you are connected to the internet.
2. Double click the AVAST icon on the desktop ( not the one on the task bar )

3. When the main program interface opens, ( single left ) click the registration button

4. On the pop up requestor, ( single left ) click the Program Registration link

5. This link takes you to the AVAST registration web page.  
(Single left) click one of the Orange options at the top of the Web page to suit the type of registration you are doing.

- After you complete the form and submit it successfully, you will shortly receive an email from AVAST with your new registration key. ( Wait about 3 minutes, then check for new emails) Look carefully in the email message until you find your license key as shown below.  
( the key shown below is for demonstration only. It is fake so don't try to use it )
- Highlight the actual license key number by holding down the left mouse button whilst dragging it over the number from left to right. Once the number is perfectly highlighted, click the right mouse button and select [copy] with the left mouse button as shown below.

- After copying the license number ( you wont visually see anything as it just goes into the clipboard memory awaiting the paste command ) close down your email program and anything else that is in the way until you find the AVAST registration requestor that has been patiently waiting on the desktop. ( Single Right ) click in the white rectangle and select [paste] with the left mouse button to insert the license number into the box.

- Finally, click the [OK] button and that's it !
